Introduction

This is an article I wrote to stress on the importance of putting a stop to racism

Chapter 1

Let's stop Racism

I believe that people of all races and religions should be accepted everywhere in the world. I feel that everyone deserves the right to education, a place to live in, an equal right to education, a right to receive health care. If we do not do our part in putting a stop to racism, then horrible things would happen like racial riots and wars which everyone would not want. However, we can learn to embrace our differences and friends of different races? friendship can start to blossom!

Moreover, I feel that if racial discrimination comes to an end, then wouldn't world piece be a piece of cake?
