Introduction

Let me give you the story of my 3 year old pug, Baby. I will tell you about her and her ways of cuteness

Chapter 1

Hi let me introduce you to my pug, Baby. I and my family picked her up at a place for 500\$. She was 6 months. On the car ride home, she looked scared and she was silent. We tried to have her sleep downstairs and she did for the first night. For the next week she favored my mom and my 20 (at the time) year-old, older brother. She followed them and either slept with mom or Roger (My brother). My mom originally gave her dry kibble food but when she went to the vet with her, they said that kibble made dogs thirsty to drink water. So she started cooking for the dog. Baby loved her food. She can devour all of it in about 30-120 seconds. Baby can't choke on it because it's like mush. Sadly, after about 2 years later she got sick from eating mom's dog food. Soon we fed her kibble and she barely ate it. She hated that type of kibble. My mom went back to cooking and my pug is healthy. Now she is beginning to sleep with me for the first time. she hogs the middle of the bed and I have a TWIN bed. I'm younger than 13 so I kind of fit. About a month ago I trained her by myself for her to sit. She obeys sometimes. I also made peanut butter biscuits with my mom for my pug. She loved them. She chews socks and shoes and stuff. But she is so cute. If you get a pug I hope you have an amazing bond!
